From the Back Cover

"General Chemistry: Principles and Modern Applications" is recognized for its superior problems, lucid writing, and precision of argument. This updated and expanded edition retains the popular and innovative features of previous editions-including "Feature Problems, " follow-up "Integrative and Practice Exercises" to accompany every in-chapter "Example, " and "Focus On" application boxes, as well as new "Keep in Mind" marginal notes. Topics covered include atoms and the atomic theory, chemical compounds and reactions, gases, Thermochemistry, electrons in atoms, chemical bonding, liquids, solids, and intermolecular forces, chemical kinetics, principles of chemical equilibrium, acids and bases, electrochemistry, representative and transitional elements, and nuclear and organic chemistry. For individuals interested in a broad overview of chemical principles and applications.

About the Author

Ralph H. Petrucci

Ralph Petrucci received his B.S. in Chemistry from Union College, Schenectady, NY, and his Ph.D. from the University of Wisconsin-Madison. Following ten years of teaching, research, consulting, and directing the NSF Institutes for Secondary School Science Teachers at Case Western Reserve University, Cleveland, OH, Dr. Petrucci joined the planning staff of the new California State University campus at San Bernardino in 1964. There, in addition to his faculty appointment, he served as Chairman of the Natural Sciences Division and Dean of Academic Planning. Professor Petrucci, now retired from teaching, is also a coauthor of *General Chemistry* with John W. Hill, Terry W. McCreary, and Scott S. Perry.

William S. Harwood

Bill Harwood received his B.Sc. from the University of Massachusetts, Amherst and his Ph.D. in Inorganic Chemistry from Purdue University in 1986. He is currently a Professor of Science Education at Indiana University, Bloomington. Previously, Dr. Harwood was at the Department of Chemistry and Biochemistry at

the University of Maryland, College Park. In his current role, Dr. Harwood continues to teach chemistry and conduct research in chemical education. He has received several awards for teaching excellence. Dr. Harwood is also active in the American Chemical Society and the Division of Chemical Education and was a consultant to AAAS project 2061. He is involved in the science reform efforts at both the pre-college and college levels. His research focuses on how best to use technology to improve learning in chemistry.

#### F. Geoffrey Herring

Geoff Herring received his B.Sc. and his Ph.D. in Physical Chemistry, both from the University of London. He is currently a Professor in the Department of Chemistry of the University of British Columbia, Vancouver. Dr. Herring has research interests in the area of biophysical chemistry and has published over 100 papers in the area of physical chemistry and chemical physics. Recently, Dr. Herring has undertaken studies in the use of information technology and interactive engagement methods in teaching general chemistry with a view to improving student comprehension and learning. Dr. Herring has taught chemistry from undergraduate to graduate levels for 30 years and has twice been the recipient of the Killam Prize for Excellence in Teaching.

#### Jeffrey D. Madura

Jeffrey D. Madura received his B.A. from Thiel College and his Ph.D. in Physical Chemistry from Purdue University. He is currently Professor and Chair in the Department of Chemistry and Biochemistry of Duquesne University in Pittsburgh, PA. Dr. Madura's research interests are in the area of computational chemistry and biophysical chemistry, and he has published over 70 papers in the area of physical chemistry and chemical physics. Recently, Dr. Madura has undertaken studies in the use of technology and interactive personal response systems in teaching general and physical chemistry with the goal of improving student comprehension and learning. Dr. Madura has taught chemistry from undergraduate to graduate levels for 15 years and has been the recipient of a Dreyfus Teacher-Scholar Award.

Just how if your day is begun by reading a book **General Chemistry: Principles And Modern Application, 9th Edition By Ralph H. Petrucci, William S Harwood, Geoff E Herring, Jeff Madura** Yet, it is in your device? Everybody will always touch as well as us their gizmo when getting up and in morning tasks. This is why, we suppose you to also read a book *General Chemistry: Principles And Modern Application, 9th Edition By Ralph H. Petrucci, William S Harwood, Geoff E Herring, Jeff Madura* If you still perplexed ways to get guide for your gizmo, you can adhere to the way below. As here, we provide *General Chemistry: Principles And Modern Application, 9th Edition By Ralph H. Petrucci, William S Harwood, Geoff E Herring, Jeff Madura* in this web site.

As understood, many individuals state that publications are the custom windows for the globe. It doesn't suggest that buying publication *General Chemistry: Principles And Modern Application, 9th Edition By Ralph H. Petrucci, William S Harwood, Geoff E Herring, Jeff Madura* will suggest that you can acquire this world. Simply for joke! Checking out an e-book *General Chemistry: Principles And Modern Application, 9th Edition By Ralph H. Petrucci, William S Harwood, Geoff E Herring, Jeff Madura* will opened an individual to assume better, to maintain smile, to captivate themselves, as well as to urge the expertise. Every publication additionally has their particular to affect the viewers. Have you understood why you review this *General Chemistry: Principles And Modern Application, 9th Edition By Ralph H. Petrucci, William S Harwood, Geoff E Herring, Jeff Madura* for?

Well, still puzzled of ways to get this publication *General Chemistry: Principles And Modern Application, 9th Edition By Ralph H. A Decent Ordinary Chemistry Textbook

By Jite

I have enjoyed using this textbook. The text is not hard to read, and generally is extremely clear and easy to understand. It has plenty of examples, which make learning the advanced material much easier. Also the examples are related to the homework problems. The homework problems include "Integrated Problems," "Project Problems" and "Advanced Problems" These problem sets combine concepts found in multiples sections and previous chapters. I have only done a few of them, and while challenging they actually are pretty fun. Every chapter has at least 1 or 2 sections that discuss applications of the theories and principles that were taught in the section. Engineering students will appreciate these sections, as they are very practical and give a preview of the applications of chemistry.

buyers seeking the textbook used should know that they probably will not have access to online media material included. But I rarely take advantage of the online material.

I suppose it's a good book

By Rory Barrett

I only used it for a general intro to chemistry course in college and quite frankly it wasn't used very much except for solving homework problems. Lectures seemed good enough but if you take inside the content is good and well explained. Just was possibly a bit much for my intro class.

tedious book

By Cory M. Salles

I had to use this book in a class at my junior college. I ended up switching books and teachers as well. This book is much drier than then most of the stuff their offering at universities. It may have been the best choice 5-10 years ago though..
